9 January 2007

Overview of Concept

- **Military Problem**
  - **Must address all capabilities required to project and sustain Joint Force operations**
  - **Must support entire ROMO**
    - **Increased support to SSTR**
    - **Increased support to IW**
  - **Inadequate Visibility of the Supply Chain**
  - **Increased emphasis on Deployment/Rapid Distribution/Sustainment**
  - **Geographically Distributed Support**
  - **Increased use/reliance on PREPO Stock**
- **Scope**
  - **Focus Window: 2015-2027 (8 to 20 yrs out)**

UNCLASSIFIED

Focused Logistics Central Idea

If we can:

- **Build the right capacity into deployment and sustainment process**
  - **Flexible industrial base**
  - **Right-sized inventories**
  - **Surge based on Joint requirements**
- **Exercise control over the pipeline from end-to-end**
  - **Visibility end-to-end**
  - **Shared Awareness/Collaboration capability**
  - **Track, shift, re-configure on-the-fly**
- **Provide assurance to the supported joint force commander that forces, equipment, and sustainment will arrive on time**

UNCLASSIFIED

Focused Logistics Central Idea (Continued)

Then the expected results will be:

- **More timely & precise delivery of mission-ready forces & support**
- **Right-sized, possibly reduced CS/CSS footprint in the Joint or combined operations area**
- **Increased precision, effectiveness & efficiency meeting Joint Force requirements**

Proposed Revision Changes

- **Reformat IAW CJCSI 3010.02B**
- **Describe Logistic capabilities areas consistent with Log Portfolio Test Case**
- **Better Define Purpose and Scope and relevance**
- **Better explain Central Idea (Capacity, Control, Reliability) and Permeate throughout entire document**
- **Accurately describe future logistic operating environment and challenges**
- **Better nest Joint Logistic Capability Requirements derived from updated CCJO, JOCs, and JFCs**
- **Fully describe Joint Logistic Capability Attributes and possible Solutions**

Current Capabilities Po

Tier I

Joint Functional Concept

Joint/Focused Logistics

Tier II

Joint Deployment Rapid Dist	Agile Sustainment	Operational Engineering	Multi-national Logistics	Force Health Protection	Information Fusion	Joint Theater Logistics

Issues

- **Supply Chain processes not portrayed in an integrated way (Agile Sustainment and Rapid Distribution)**
- **Incomplete … lacks Contracting and Personnel Services Support**
- **Not all are capabilities (i.e. Information Fusion … an enabler, not a stand alone capability)**
- **Terms not universally understood (i.e. Agile Sustainment)**

Proposed Test Case Portfolio C

Tier I

Joint Sustainment

Tier II

Force Health Protection	Personnel Services	Operational Engineering	Supply Chain Operations	Logistics Services
• Casualty Mgmt. • Patient Mvmt. • Medical Log • Preventive Med	• Postal / Finance • Per Readiness • Legal Services • Religious Support • Exchange Spt	• Plan / Design • Construct / Dev • Maintain Infra-structure	• Deploy / Dist • Plan • Supply / Source • Maint / Repair	• Contracting Spt • Food Service • Mortuary Affairs • Field Svcs.

Changes

- **Includes all capabilities to project & sustain the Joint Force**
- **Integrates the Supply Chain**
- **All have measurable inputs and outputs**
- **Facilitates strategic and integrated resourcing**
